

WE HAVE BEEN IMAGINING THE FUTURE FOR SIXTY YEARS

LEARNING
FROM
YESTERDAY,
WE ARE
WORKING
TOGETHER
TO BUILD
TOMORROW

COMERI

ON THE SHOULDERS OF GIANTS

ALWAYS LOOKING AT TOMORROW

...we are intuitive, passionate and visionary

Only if the roots are solid will a plant grow vigorously. At Comepi, our entrepreneurial and human roots grow deep in fertile soil.

Intuition, technical skills and the long-sightedness of brothers Luigi, Felice and Ambrogio Comi have brought about a transformation: from the first mould to the creation of a business that today is an important point of reference in the world of solutions for automation and machinery manufacturing.

A passion which, since the beginning, has resulted in quality products which have set new standards, meeting the needs of the most demanding customers and developing new markets.

A vision which, over all these years, has connected past and present, forming a central theme with an entrepreneurial story projected towards the future.

Today at Comepi we are stronger than ever, ready to face the challenges of an increasingly dynamic and competitive market.

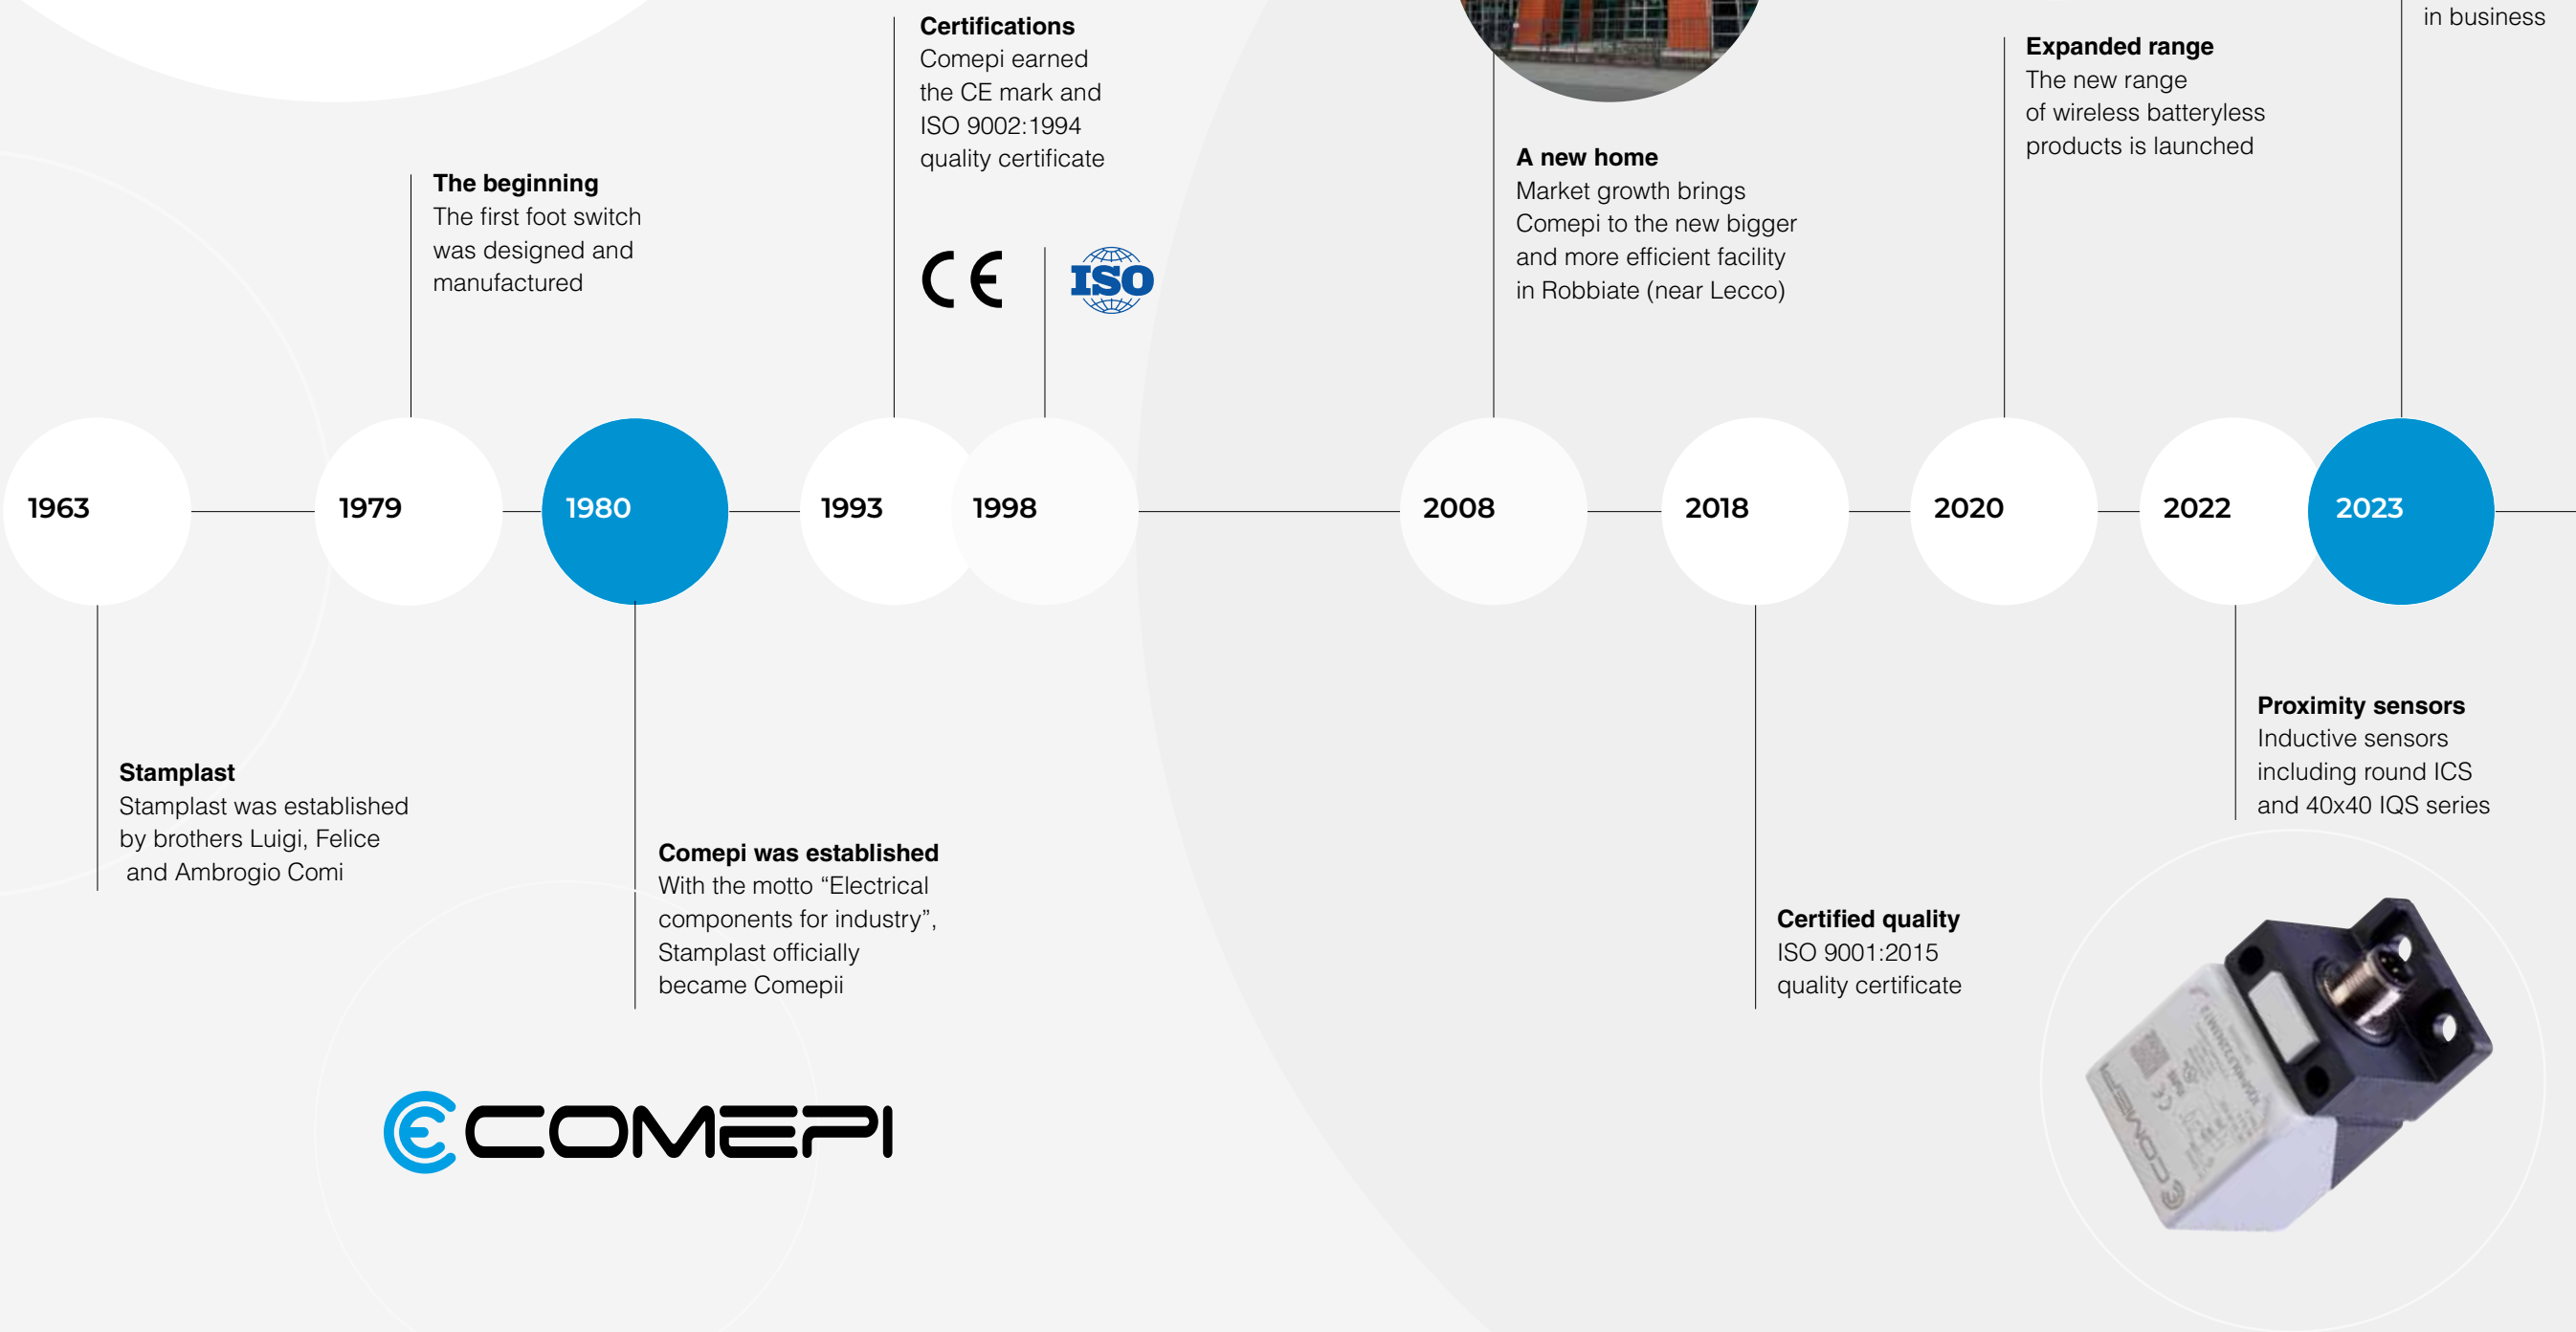

1963
Comepi's story begins:
from the initial idea
to a complete range
of innovative solutions

THE MILESTONES OF INNOVATION

COMEPI, AN (EXTRA)ORDINARY STORY

Many things have changed over sixty years, but one thing that has not is our desire to continue to innovate products and services. This is reflected in the development of our technology, company growth and the numerous certificates we have obtained. Our objective? To be the best choice for clients throughout the world.

1963

Stamplast
Stamplast was established by brothers Luigi, Felice and Ambrogio Comi

1979

The beginning
The first foot switch was designed and manufactured

1980

Comepi was established
With the motto "Electrical components for industry", Stamplast officially became Comepii

1993

Certifications
Comepi earned the CE mark and ISO 9002:1994 quality certificate

1998

2008

A new home
Market growth brings Comepi to the new bigger and more efficient facility in Robbiate (near Lecco)

2018

Certified quality
ISO 9001:2015 quality certificate

2020

Expanded range
The new range of wireless batteryless products is launched

2022

Proximity sensors
Inductive sensors including round ICS and 40x40 IQS series

2023

60 years old!
Comepi marks the milestone of 60 years in business

OUR VALUES

TOWARDS THE INFINITE, OBSTACLE FREE

...we are brave, dynamic and determined

The future, for us, is not something that happens, but something that is created. Our history has taught us this. With courage, we have chosen to directly manage the entire production process, putting people at the centre of it all: a motivated, capable and entrepreneurial team, who we want to fully support.

Similarly, we work with the best suppliers to identify, together, optimal solutions for a dynamic market in continual evolution.

With determination, we seek excellence in every aspect of our work, from design, production, and quality control to service: to reach a horizon that is not the end of the race, but just a stage as we move in the direction of the next destination.

OUR MISSION

WE OPEN THE DOORS TO CHANGE

...we are curious, idealist and positive

Comepi is a family business that has been able to become a point of reference for the market of spare parts for automation, in Italy and abroad, thanks to its ability to look beyond.

We do not stop when we come up against a closed door and not even when we have achieved success! We like change, experimentation, following (and sometimes anticipating) technological evolution.

For sixty years, this has been our way of meeting the demands of the market: always with a smile.

OUR TEAM

WE PUSH INNOVATION

...we are pragmatic, young and collaborative

Evolution is made up of thrusts forward and settling, acceleration and consolidation, anticipating and waiting. At Comepi, research, development and the continual design of new solutions dictate the pace of growth. Our engineering department is the spark and engine of the process: each request is taken on, analysed, evaluated and developed to meet the specific needs of the customer and sector of reference. The know how we have accumulated in years of working with hundreds of customers is the starting point for finding the best solution and enables us to provide co-engineering services where needed.

We always have a ready solution and, alternatively, we are willing to develop one alongside our customers.

THIS IS US: A COHESIVE TEAM, PASSIONATE AND POSITIVE. WE LOVE CHALLENGES AND WE ARE NOT AFRAID TO GET INVOLVED. WE SHARE THE SAME VALUES AND THE SAME OBJECTIVES. WE LOOK POSITIVELY TO THE FUTURE AND WE HAVE THE DESIRE TO CONTINUE TO GROW.

A FAMILY STORY.

SINCE 1963, THE AIR WE BREATHE AT COMEPI IS ONE OF SHARING, OF THE DESIRE TO CREATE SOMETHING WITH **PASSION** AND THAT **STIRS PASSION**.

DAY AFTER DAY, THANKS TO THE ABILITY AND THE WORK OF EVERY INDIVIDUAL MEMBER OF STAFF, THE COMPANY CREATED BY THE COMI BROTHERS HAS GROWN, IT HAS BEEN STRUCTURED TO THE POINT OF BECOMING AN INDUSTRIAL REALITY THAT IS APPRECIATED AROUND THE WORLD, BUT **WITHOUT EVER LOSING SIGHT OF ITS FIRST OBJECTIVE**. TO CREATE A WORKPLACE WHERE PEOPLE CAN DEVELOP TO THEIR FULL POTENTIAL, FIND SATISFACTION AND CONTRIBUTE TO THE COMPANY'S GROWTH.

A PLACE **WHERE EVERYONE IS A VITAL PART** OF A PROJECT, SHARING AIMS AND OBJECTIVES. WHERE SAFETY AND TRAINING ARE THE FOUNDATION FOR EXPRESSING EVERYONE'S VALUE IN A **POSITIVE AND INCLUSIVE SETTING**.

OUR DNA

COMEPI, FROM A TO Z

Companies in the machinery manufacturing and industrial plant sector trust us for many reasons. The first is that we can offer an all-round service, from engineering to after-sale assistance.

ENGINEERING

The starting point for each project, our engineering department develops products and application solutions based around market demand.

MOULD AND EQUIPMENT MANUFACTURING

In-house equipment manufacturing means we can manufacture the moulds for plastic and metal we need to ensure a high-quality product.

IN-HOUSE PRODUCTION

We have automated lines and manual stations to meet the requests for high production rates and component personalization.

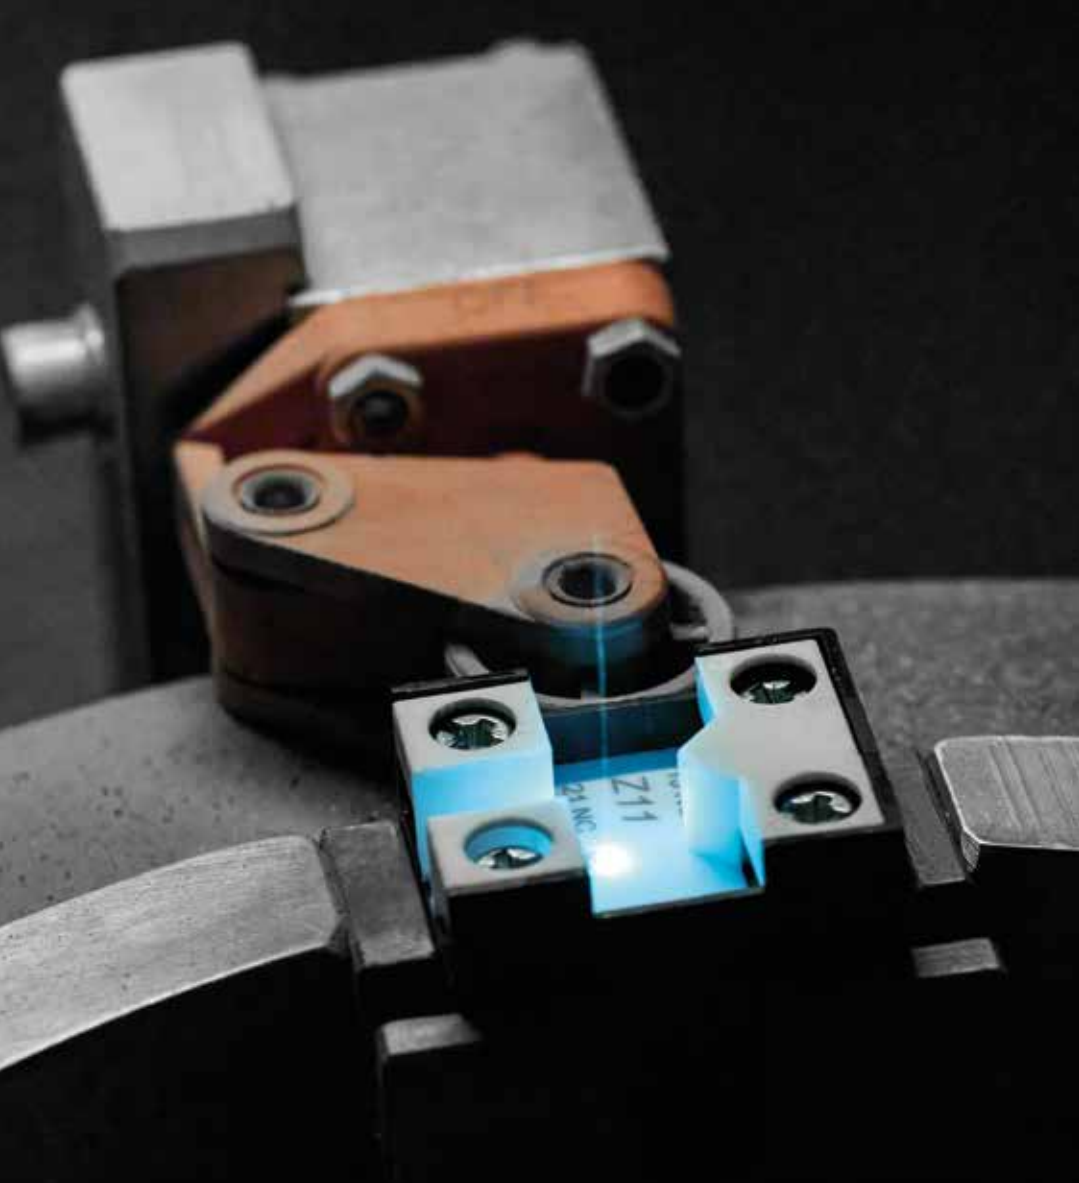

QUALITY AND SERVICE

The quality of our products is based on rigorous assessment as early as the manufacturing stage, and product trial and testing in every operating condition.

CUSTOMER CARE

Our advice and after sale service staff are always ready to respond to customer demands.

OUR PRODUCTS

OUR PERSONAL TOUCH

...technology, reliability, made in Italy

As vast as it is, our product catalogue is just the starting point for finding the right response to the needs of every company. Our staff can evaluate which solutions to propose or, alternatively, suggest variations or special products. The catalogue includes thousands of codes, organized according to type or markets:

- **Safety devices**
- **Limit switches**
- **Proximity sensors**
- **Wireless batteryless devices**
- **Enclosures and pushbuttons**
- **Foot switches**
- **Lift devices**

Each one is Made in Comepi and Made in Italy: an extra layer of quality guarantee in addition to reliability according to current standards as required by manufacturers of modern production plants.

SAFETY DEVICES

Comepi safety devices are designed to meet the most stringent requirements in all application sectors. This category includes safety modules, interlocking devices for monitoring the mobile safety guards and emergency stop devices. This is how Comepi delivers safety on top of innovation and quality so its clients can always count on a totally safe, reliable, high performing system. The quality of Comepi products combines with the search for innovative solutions to provide an increasingly complete and reliable safety system.

LIMIT SWITCHES

Comepi offers its clients one of the most complete ranges on the market to use in multiple applications. Comepi's limit switches are easily customized thanks to the availability of different actuator heads, cable connections, control units and materials used.

WIRELESS BATTERYLESS DEVICES

Comepi's wireless transmitters combine practical wireless installation with batteryless operation: they in fact integrate a patented technology that uses the kinetic energy of actuation to generate the energy needed to transmit a signal.

PROXIMITY SENSORS

For contact free reading of the position of metal objects, Comepi's inductive sensors are the ideal choice in terms of functionality, reliability and certification. They are available in different shapes, with various connections and activation distances.

LIFT DEVICES

For the world of lifts, Comepi delivers a series of reliable and widely tested accessories and devices. All the products in the catalogue comply with the latest standards, such as EN 81-20 (technical requirements) and EN 81-50 (engineering, calculations and component testing).

ENCLOSURES AND PUSHBUTTONS

The point of contact between man and machine, Comepi pushbuttons cover every type of need in every sector, from simple to emergency actuation, as well as signal lights and joysticks. Two series are available: metal and thermoplastic, both robust and simple to use. The modular design of the pushbuttons, available in thermoplastic or aluminium, facilitate subsequent personalization of the interface.

FOOT SWITCHES

Comepi's historical product, foot switches feature a particularly sturdy design thanks to their solid structure. Available in hundreds of variants, they come in different sizes, functions and colours. This family also includes the mini-foot switches for lighter applications.

OUR CERTIFICATES

EVERYTHING TO STANDARD FOR EVERY MARKET

Delivering our solutions abroad and in specific applications sectors first of all means meeting all relevant standards and certification requirements. Since the first quality certificate, the ISO 9002 in 1998, we have pursued this path knowing that it would open doors to markets and applications spread across the most diverse contexts. This was the case. Today Comepi holds the leading product and system certificates, needed to work around the world: EC, UL, CCC, UKCA, IMQ, CSA, FCC, TUV, CMIM, TREACH, ROHS and more still.

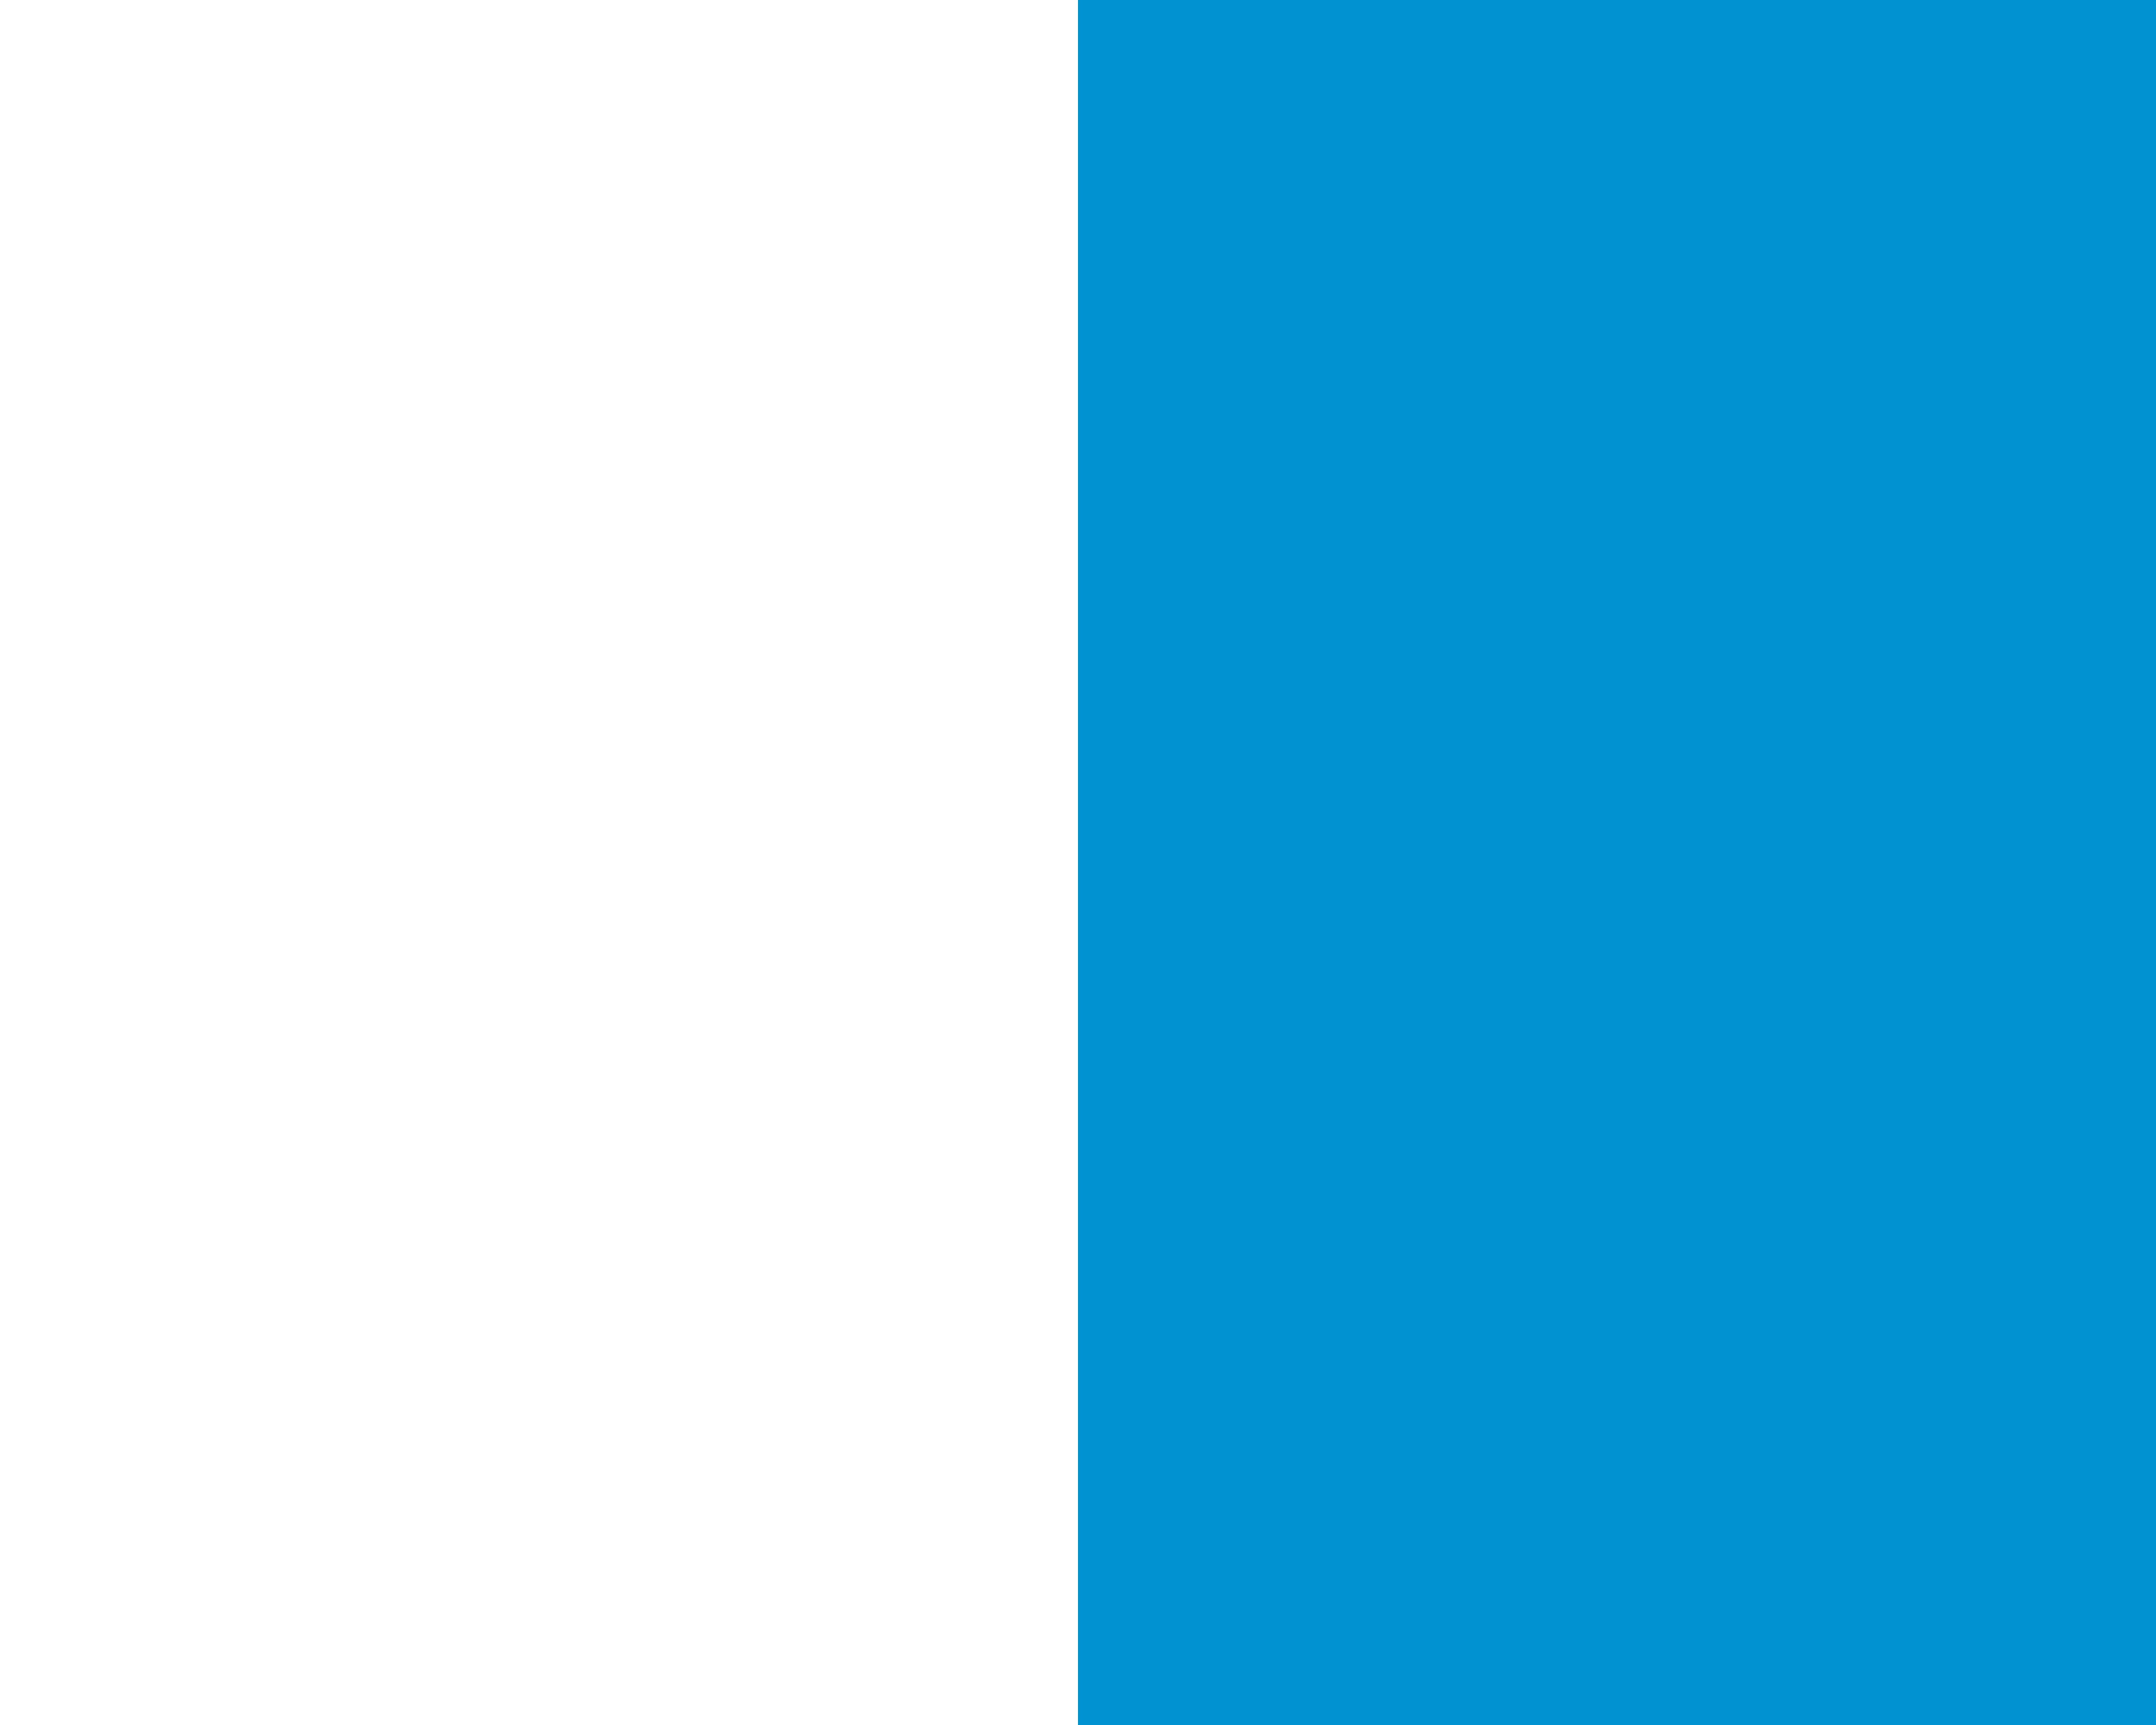

COMEPI AROUND THE WORLD

HERE WE BRING OUR “MADE IN ITALY”

Comepi products come from Italy, but a great deal of them end up on the most distant markets. We deliver our products to 76 countries around the world thanks to the support of local agents, importers and distributors.
